Subject: Product Registration Modification, Presby Enviro-Septic

Dear Mr. Presby:

It is my understanding from our conversations and information submitted recently that you wish to modify the Division's acceptance of the Enviro-Septic.

**Product Description**

The modification consists of revising the separation distance from the seasonal high groundwater table or other limiting factor to the bottom of the sand layer beneath the products, to the bottom of the Enviro-Septics themselves.

**Claim**

According to the information you provided, including third party test data, the Enviro-Septic performs sufficiently well that the previously required increased separation distance is no longer required..

**Determination**

On the basis of the foregoing and a sample of the product provided to the Division, the Division has determined that the this modification is acceptable for use in the State of Maine.

Because installation and owner maintenance has a significant effect on the working order of onsite sewage disposal systems, including their components, the Division makes no representation or guarantee as to the efficiency and/or operation of Presby Enviro-Septic. Further, registration of these products for use in the State of Maine does not represent Division preference or recommendation for this product over similar products.

If you have any questions please feel free to contact me at (207) 287-5695.

Sincerely,

James A. Jacobsen, Environmental Specialist IV  
 Wastewater and Plumbing Control Program
